I talked with Ernie Chandler of Gold Hill (435234-1132) on 10/10/2001 and discussed the reclamation plan at the Yellowhammer Mine after researching the plan, I informed Ernie that it was discovered that the pit highwalls where to be reduced to less than 2:1 and the mine outcrops did not need to be reclaimed as a variance was given. Mr. Chandler stated that dynamite will need to be used to reduce the slopes. I told him to get together with Jenny Wiebel of IMM and decide if it could be accomplished for less then the bond amount and that they would most likely accept that bid. I informed Ernie that at the time he indeed gets the project, that I would be willing to help in any way I could to move this along.
